DETAILED ACTION

1.

Claims 1-32 are pending in this application filed July 18, 2003.

Applicant's claims are directed toward photoprotective sunscreen compositions comprising 1,3,5-triazine and triesters of benzenetricarboxylic acids.

Claim Rejections - 35 USC § 102

2.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3.

Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Gers-Barlag et al USP No. 6,368,578 B1.

Gers-Barlag et al disclose cosmetic and dermatological light protection formulations with substituted triazine derivatives. In column 6, lines 20-28, Gers-Barlag further discloses that the specific 1,3,5-triazine derivative is sold under the trademark name Tinosorb S which is the specific compound claimed by applicant. In column 13, lines 30-55 Gers-Barlag further discloses that the photoprotective composition comprises a polar oil component more specifically tridecyl trimellitate which is the specific triester of a benzenetricarboxylic acid having from 3 to 30 C atoms claimed by the applicant. In column 14, lines 26-40, Gers-Barlag discloses that other cosmetic agents or adjuvants such as stabilizers, thickeners, stabilizers, polymers etc. are also present. In column 15, lines 10-20 Gers-Barlag discloses the specific inorganic pigment based on metal oxides claimed by applicant. Further in column 15 through to column 17, Gers-Barlag discloses all other organic UV screening agents claimed by

applicant specifically in claims 21-23. Gers-Barlag discloses that an additional dialkyl naphthalate is also present; however, applicant's open terminology of "comprising" does not exclude said additional component. Gers-Barlag discloses each and every aspect of the invention as claimed by applicant.
